

#484 HP Projection Duplicating Film

Description

HP Projection Duplicating Films are high speed, high contrast reversal film designed for camera line and copy dot reproduction. Anti-static properties yield clean films requiring minimal opaquing.

Characteristics

#484 HP Projection Duplicating Film is on a dimensionally stable .004 thick optically clear polyester base.

Safelight

#484 can be handled under a series 1A (red) filter, or equivalent, with a 15 watt bulb. The safelight should be no closer than 4 feet to the film.

Exposure

Pulsed Xenon	(4x1500 watts) 27 sec (54 sec through base)
Quartz Halogen	(4x1000 watts) 54 sec (108 sec through base)

Processing

Developer:

All #1 Network Rapid Developers are recommended for best results.

(May be diluted 1 part to 2, 3 or 4 parts water)

Temperature: 95°F / 35°C

Developer Time: 25 - 30 Seconds

Note:

When you install new films or processor chemicals, it is a good ideal to run a few "**Dr. Clean**" cleaner sheets.

"**Dr. Clean**" cleaner sheets will virtually eliminate any potential for pinholes and ensure that every #1 Network film will look it's very best!
