Back Cylinder Ink Preventer

Convenient spray-on coating prevents ink from sticking to your back cylinder and marking your press sheets. Back Cylinder Ink Preventer reduces future ink build-up, and thus offsetting, and costly down time. Sold only in full cases, no air shipments.

BACKC-200415	14 oz. Aerosol Cans - full case	6	Case	7	
--------------	---------------------------------	---	------	---	--

Fargel®

Ink additive specially formulated to accelerate ink drying time which helps prevent offsetting. Fargel works on any porous paper stock and with oil, rubber, soy, acrylic, laser/thermal, or metallic inks, and in overprint varnish. Fargel will not reduce the ink's open time.

FARGEL-1008-FG	8 oz. Jars - full case	6	Case	4	
FARGEL-1008-B	8 oz. Jar - broken case	n/a	Jar	0.7	
FARGEL-1016-FG	16 oz. Jars - full case	6	Case	8	
FARGEL-1016-B	16 oz. Jar - broken case	n/a	Jar	1.5	

Formula 86 - Fountain Solution Additive/Alcohol Replacement

Formulated for both integrated and conventional dampening systems, Formula 86 prevents emulsification on all offset duplicating presses. It eliminates bleeding, allows for faster drying, sharper printing, and provides a smoother lay of ink.

FORMU-610301	Quarts - full case	6	Case	14	
FORMU-610301-B	Quart - broken case	n/a	Quart	2.5	
FORMU-610303	Gallons - full case	4	Case	36	
FORMU-610303-B	Gallon - broken case	n/a	Gallon	9.5	

Jomac® DCC - Dampening Cover Cleaner

Gentle but very effective cleaner is specially formulated to remove ink off press from sleeves, rollers (rubber and synthetic), and nitrile gloves. DCC will not break down the fibers of roller covers, causing premature wear. Sold only in full cases.

DCC-GALLON	Gallons - full case	4	Case	40	
------------	---------------------	---	------	----	--

Jomac® DPS - Dampening Prep Solution

Jomac Dampening Prep Solution can be used on and off press, and enhances the water affinity of dampening covers and rollers in continuous dampening systems. By creating a thin, even application of water to the plate, and reducing ink contamination of dampening rollers, DPS gives you faster, trouble-free start-ups. Sold only in full cases.

DPS-QUART	Quarts - full case	6	Case	14	
-----------	--------------------	---	------	----	--

Laser Direct™ Universal Fountain Solution

Fountain solution formulated for use with polyester laser plates is also compatible with silver-based and metal plates, which makes it an ideal multi-purpose fountain solution. It should always be diluted (32:1, water to solution) when wetting and running laser plates.

LASER-54103	Gallons - full case	4	Case	39	
LASER-54103-B	Gallon - broken case	n/a	Gallon	10	

Laser Direct™ Plate Cleaner

This cleaner is specially formulated for polyester laser plates and is uniquely suited for cleaning plate surfaces and removing toner scatter that can cause tinting on press. Using Laser Direct™ Plate Cleaner is an easy, economical, and efficient way to get the best reproduction from dry toner imaged laser plates. Use full-strength with a soft, low-linting cotton pad or sponge.

LASER-520701	Quarts - full case	6	Case	14	
LASER-520701-B	Quart - broken case	n/a	Quart	2.5

<i>Product number</i>	<i>Description</i>	<i>Units per Case</i>	<i>Sales U/M</i>	<i>Shipping Weight</i>	<i>Comments</i>
Magic!					
Magic! cleaner and conditioner can be used on all silver-based photo direct or laser image plates. Magic provides longer, cleaner runs of black and colored inks during hot or cold weather, sharper lines and halftones, and eliminates toning and scumming.					
MAGIC-221059	Pints - full case	6	Case	5	
MAGIC-221059-B	Pint - broken case	n/a	Pint	1	
MAGIC-221103	Gallons - full case	4	Case	39	
MAGIC-221103-B	Gallon - broken case	n/a	Gallon	10	

Maticlean

This cleaner and conditioner can be used on chrome, rubber, nylon, and ceramic metering rollers in continuous dampening systems. Maticlean quickly removes ink build-up and any other oily matter. Maticlean coats the roller surface with its unique formula to make it more water receptive.

MATIC-222611	Quarts - full case	6	Case	13	
MATIC-222611-B	Quart - broken case	n/a	Quart	2.5	
MATIC-222613	Gallons - full case	4	Case	33	
MATIC-222613-B	Gallon - broken case	n/a	Gallon	9	

RCL - Reactive Cross Linking Fountain Solution

GATF award winning one step fountain solution dramatically decreases the time needed for ink to setup and dry. RCL does not require alcohol or other additives. U.V. and IR dryers increase RCL's effectiveness but are not necessary.

RCL-503	Gallon	n/a	Each	9	
RCL-506	5 Gallon	n/a	Each	45	
RCL-508	55 Gallon	n/a	Each	510	

Total Release Compound (TRC)

Unique ink additive improves the transfer of ink from the printing blanket to the press sheet, which results in more consistent solids with reduced voids, shading, and ghosting. TRC also reduces ink tack without affecting ink body or the ink's open time. TRC can be used with oil, soy, rubber, acrylic, laser/thermal, U.V., or metallic inks and in overprint varnish.

TRC-0014	14 oz. Jars - full case	12	Case	13	
TRC-0014-B	14 oz. Jar - broken case	n/a	Jar	1.5	
TRC-0024	24 oz. Jars - full case	6	Case	11	
TRC-0024-B	24 oz. Jar - broken case	n/a	Jar	2	
TRC-0006	6 lb Can	n/a	Can	6
