### All Purpose Proofing Paper

Base-Line All Purpose Proofing Paper is a one side matte-coated paper. It is ideal for your general proofing applications, art reproduction, photo enlargements, posters, presentations and printing of geographic information systems (GIS). This medium is compatible with pigment and dye inks. Drying time is fast and the print is easily laminated with pressure-sensitive or thermal laminates for an extended archival life.

### Semi-Gloss Resin Coated/Microporous Proofing Paper

Base-Line Soft Gloss Microporous is an instant drying, heavy weight resin coated paper, with soft gloss coating on one side. The back side is antistatic treated to prevent difficulties in handling on the printers. This product was developed for high speed, high production wide format ink-jet printers. It is compatible with dye- or pigment-based inks. It offers instant drying time, vibrant colors and excellent image clarity, even with pigmented inks. The applications for this medium are the same as for the C1s and C2s matte proofing papers.
