# POLYESTER LASER PLATES FOR

**HP 5000/5100  
SERIES PRINTERS**

**XANTÉ  
PLATEMAKERS 3 AND 4**

- Eliminate the need for expensive cameras, platemakers, processors, imagesetters and darkroom equipment
  - Compatible with off shelf dry toner printers
    - No etching
    - No darkroom chemicals, no processing
  - Tough and resistant to scratching and buildup
- Excellent for spot color, screen and halftone work as well as letterhead, business cards and literature

#1 Network now offers two types of laser plates - Laser Plate that is great for HP 5000/5100 printers and LaserX Plate designed for Xanté Platemakers 3 and 4

#1 Network Laser Plate is approved by Hewlett Packard and provides a zero defect performance when used with the HP LaserJet 5000 Laser Printer.

#1 Network Laser Plate has been especially developed to be corrosion free and has been meticulously tested by Hewlett Packard and approved for this unique and indispensable feature.

#1 Network LaserX plates have been optimized to provide maximum performance on Xanté Platemaker 3 and 4 printers.

#1 Network LaserX plate is a single sided plate, capable of providing a run length of 10,000 or more impressions under correct imaging and press conditions.
